Workers' Compensation Payout!

If a worker quits after an ICE raid or cannot provide proper documentation, take the following steps:

DO THIS:

1. ALWAYS back up your surveillance video - on a flash drive or CD, RECORD EE SHIFT for the last three weeks of employment.
2. Reason: These individuals WILL put in a Workers' Compensation claim. They will wait until the surveillance video has been erased, and then file a claim.
3. Be able to reproduce ALL payroll records and any documents stating they did not suffer a Workers' Compensation injury that pay period. (you should already have something in place provided by 7-Eleven Corp.)
4. Let Barbot Insurance Services know the names of the individual filing a claim. We will coordinate with Mitsui Sumitomo to establish a file ready to defend you.
